

ACRE

FLAT CROWN MOULDING

Suited for a wide range of applications, **ACRE** is the perfect medium for executing your ideas. This revolutionary material can be cut, curved, shaped and molded to fit countless applications, both exterior and interior.

PROFILE DETAILS

WIDTHS (A)	THICKNESS (B)	LENGTHS
4", 6"	3/4"	16'

Available in:

ACRE Grain

WORKS LIKE WOOD - BUT BETTER!

- Paintable and stainable. No primer necessary
- Easy to rout, cut and sand in the field with regular wood working tools
- Easy on tools. Minimal melting or static-charged dust
- No harmful residue
- Pre-drilling not required. Screws and nails will not mushroom.
- Uniform texture throughout and finish-ready, no need to seal or treat ends.

MODERN·MILL
BUILDING REVOLUTIONS

NATURAL BEAUTY

- Genuine warm look and feel of wood.
- Natural-looking grain.
- Endless finish options with water-based paints or stains. See Coatings Guide for important information.
- Thermoform for folded corners, curves and creative shapes.

UNMATCHED DURABILITY

- Resistant to water, weather, rot, splintering, and pests - even termites!
- Smooth screw application close to edges, and into sides without splitting
- Suitable for ground and water contact
- Sturdy, resists breakage and job site damage
- Debris from cutting will fall and brush off surfaces and clothing (less static cling than traditional PVC)
- Easy on tools when routing, cutting, and screwing
- Strong screw and nail retention. Superior bond with a wide range of glues and construction adhesives
- Low maintenance and easy to clean
- Virtually no moisture absorption so paint lasts longer than on wood
- Less expansion and contraction than competitive PVC products
- Lightweight, yet strong and straight

SUSTAINABLE INNOVATION

- Made in the U.S.A.
- 100% tree-free
- Upcycled natural fibers from discarded rice hulls, a rapidly renewable resource
- Free of phenol, formaldehyde, and adhesives
- Zero-waste manufacturing

Effective: April 2026

FIRST TIME USING ACRE?

Visit our website for important installation, technical, and coatings resources.

ACRE contains PVC and requires coatings with a light reflective value (LRV) of 55 or greater to avoid heat build up or changes to physical properties.

Consult with Modern Mill for more information.

EXTREME HEAT WARNING

Be aware of excess heat on ACRE surfaces such as but not limited to fire, direct or reflective sunlight, reflective sunlight from energy-efficient window products. Low-emissivity (Low-E) glass can harm ACRE products because Low-E glass products are designed to prevent passive heat gain within a structure and can cause unusual heat build up on exterior surfaces from sunlight reflection. The extreme rise of surface temperatures can create an environment which exceeds normal exposures and may create scenarios which can cause ACRE products to melt, sag, warp, discolor, expand and contract beyond acceptable tolerances or accelerate weathering. Be sure to consult Modern Mill's coatings guide, sales representatives or contact us at zen@modern-mill.com or 601-869-5050 for consultative assistance before installation.
