

# WELCOME TO A WORLD BEYOND WOOD

MEET MODERN MILL

ACRE™ BY MODERN·MILL

We are a manufacturing company based in Fernwood, Mississippi that specializes in ACRE™, a sustainable wood-alternative material. Since our inception in 2020, we have partnered with distributors throughout the U.S. to provide quality eco-friendly trim boards, dimensional lumber, sheet goods, outdoor furniture, decking and siding—bringing back a rich history of craftsmanship back to Mississippi in our zero-waste factory.

## PUT PEOPLE FIRST.

---

We care deeply about the people who produce and use our products. We hold ourselves to the highest standards and ensure everyone is treated with dignity and respect. We offer a safe workplace and opportunities to acquire new skills and advance careers.

## MAKE THINGS BETTER FOR THE PLANET.

---

With every ACRE™ board we produce, we never compromise on performance or sustainability. ACRE is tree-free, made from upcycled rice hulls in a zero-waste environment and is 100% recyclable and performs better than traditional building materials.

## PURSUE RELENTLESS INNOVATION.

---

ACRE represents a new beginning, but it is not an end in itself. We seek to bring groundbreaking ideas to an industry that has long been waiting for them. We will never stop trying to create products that are more sustainable, more durable, and more beautiful than anyone has experienced before.
