

STEP INTO A WORLD BEYOND WOOD

WITH ACRE DECKING

ACRE™ BY MODERN·MILL

The beauty of wood. The durability of ACRE

ACRE offers everything you want in a decking material and more. With the look and feel of luxurious woods like ipe, ACRE stays comfortable under foot, even in the sun. On the jobsite, it is a dream to work with—strong, straight, lightweight, and easy to cut with regular tools. But ACRE doesn't contain a single wood fiber to splinter, warp, rot, or trap moisture. It's a new, sustainable material, manufactured from upcycled rice hulls right here in the USA. ACRE comes with a limited lifetime guarantee, creating decks you can really feel relaxed about.
